

First you put a light green background. Then you get darkish pink circles for the body, one is bigger and it is on the bottom, one is middle size and it is in the middle, one smaller and that is one the top. But outline the lines on the outside of the circle really close to the circle, they are white. Then I put kind of bark brown arms but they are kind of big and they go out and are about the size of the middle circle. There are also middle sized black buttons, right in the middle of the middle circle, one is close to the top, then the other one is touching the bottom of the middle circle, after that there is one in the middle of the two and that one is touching the last button on the middle circle and there are only three. Then smaller sized black dots for a mouth that is more to the left, that goes at the bottom of the head, the head is the very top. Next a small sized carrot nose, kind of small. The point of the carrot is pointed to the right. After that the eyes are white and the same size of the mouth. Next for the blue hair. That is about the color of a dark blue but not a dark dark blue about like the color of the sky in the almost time of night, the hair goes out not to far and it stops at the end of the head.
